

MEMORANDUM

To: Parents, Teachers,
and Staff

From: Brian L. Smith, LEA/DP
Director of Facilities

Subject: Annual Notification of Availability of Asbestos
Management Plan and Updates of Activities
National Trail Local Schools

On October 22, 1986, President Reagan signed into law the Asbestos Hazard Emergency and Response Act (AHERA, Public Law 99-519). The law required EPA to develop regulations, which provide a comprehensive framework for addressing asbestos problems in public and private elementary and secondary schools. On October 30, 1987, EPA published the Asbestos-Containing Materials in Schools Rule (40 CFR Part 763 Subpart E). This new rule required all public and private elementary and secondary schools to inspect for friable and non-friable asbestos in school buildings, develop management plans that address asbestos hazards in school buildings, and implement response actions in a timely fashion.

One of the requirements of this law is to annually notify parents, teachers, and staff of the availability and location of the management plan for the school building. The Management plan for this school is located in the Director of Facilities Office. Also, inspections/reinspections, response actions, and post-response action activities are included in the management plan for your review.
